

RESEARCH STATEMENT My research focuses on trustworthiness and robustness for deep learning, offline optimization, meta-learning, and bandit problem formulations. I am broadly interested in developing methods that leverage prior knowledge to help algorithms better generalize to new distributions. I explore these problems in the setting of generative design, AI4Science, minority health disparities, and medical imaging.

EDUCATION

University of Pennsylvania, MD-PhD Program
NIH F30 NRSA Fellow, HHMI-NIBIB Interfaces Fellow | 2021 - Present
Advised by [Osbert Bastani](#) and [James Gee](#)
Penn Engineering [Teaching Award](#) Recipient
MD-PhD, Bioengineering (in progress)
MSE, Computer Science (in progress)

California Institute of Technology
Salutatorian | 2017 - 2021
Advised by [Mikhail Shapiro](#)
BS, Applied Physics

EXPERIENCE

PhD Research Intern, [Genentech GenAI](#) South San Francisco, CA | 2025
Designed algorithms for discovering and evaluating personalized multi-drug combination therapies using LLMs as offline optimizers.

Human Frontier Collective Intern, [Scale AI](#) Remote | 2025
Developed complex, multi-step reasoning datasets for LLM training model and evaluation for code, math, and medical reasoning.

Health VC Fellow, [25madison](#) New York City, NY | 2024
Bridged clinical and engineering teams to help drive clinical operations for stealth healthtech incubation. Led exploratory investment research into digital health sectors.

AI Clinical Fellow, [Glass Health](#) Remote | 2023-2024
Released and assessed clinical guideline articles as knowledge sources for large language models (LLM). Investigated applications of LLMs for medical education.

Medical LLM Consultant, [Scale AI](#) Remote | 2023
Evaluated use cases of LLMs for healthcare. Red team-tested LLMs for accuracy and trustworthiness in real-world clinical workflows.

PhD Research Intern, [Microsoft Research](#) Redmond, WA | 2022
Developed ML methods for accelerated MRI imaging. Proposed novel techniques for better generalization of MRI image reconstruction models.

Software Engineer, [Hyperfine Research](#) Guilford, CT | 2021
Implemented and validated algorithms for more robust MRI signal acquisition and image post-processing in MR software across 25+ hospital sites.
